

KEEP HEDGEHOGS SAFE *when gardening*

Gardening equipment kills hedgehogs

Hedgehogs are dying out - many are killed each year through gardening injuries.

Please check compost piles and overgrown areas before digging – strimming – mowing

Keep garden netting 0.5metres above the ground so hedgehogs don't get tangled

Create a ramp to allow easy access out of garden ponds

Slug pellets kill hedgehogs

Most Slug pellets are harmful to hedgehogs and other wildlife - please consider alternative slug and snail management method such as Nematodes and Slug Gone Wool Pellets
